

M.Sc. in Data Analytics and Artificial Intelligence

Programme Handout 2025/26¹

Department of Computer Science
Hong Kong Baptist University

¹ The information in this handout is correct to the best of our knowledge at the time of writing. In case of discrepancy, the information provided by the University prevails. Please login into [BUniPort](#) for the most up-to-date information.

1. Programme Curriculum

Each student is required to successfully complete at least 29 units as follows:

- **14 units of core courses:** Each student must successfully complete six core courses.
- **15 units of elective courses:**
 - The elective courses are divided into the following. Students can freely select these elective courses.
 - Stream 1 – Data Analytics
 - Stream 2 – Artificial Intelligence
 - Stream 3 – Intelligent Information Systems
 - MSc Practicum & Research (not counted as a stream)
 - Students can also select at most 6 units from a list of designated courses. For details, please refer to Section 4 of this handout.

The courses are listed below.

Core Courses	14 units
---------------------	-----------------

COMP7015 Artificial Intelligence	3 units
COMP7035 Python for Data Analytics and Artificial Intelligence	3 units
COMP7180 Quantitative Methods for Data Analytics and Artificial Intelligence	3 units
COMP7990 Principles and Practices of Data Analytics	3 units
COMP7530 IT Forum	1 unit
COMP7950 IT Project Skills	1 unit

Elective Courses	15 units
-------------------------	-----------------

Stream 1 – Data Analytics

COMP7170 Data Security and Privacy	3 units
COMP7260 Special Topics in Data Analytics	3 units
COMP7640 Database Systems and Administration	3 units
COMP7650 Data Mining and Knowledge Discovery	3 units
COMP7810 Business Intelligence	3 units
COMP7930 Big Data Analytics	3 units

Stream 2 – Artificial Intelligence

COMP7045 Natural Language Processing and Large Language Models	3 units
COMP7055 Computer Vision	3 units
COMP7125 Prompt Engineering for Generative AI	3 units
COMP7220 Special Topics in Artificial Intelligence	3 units
COMP7240 Recommender Systems	3 units
COMP7250 Machine Learning	3 units
COMP7630 Web Intelligence and Its Applications	3 units
COMP7650 Data Mining and Knowledge Discovery	3 units
COMP7810 Business Intelligence	3 units

Stream 3 – Intelligent Information Systems

COMP7065 Innovative Laboratory	3 units
COMP7190 Special Topics in Intelligent Information Systems	3 units
COMP7200 Blockchain and Cryptocurrencies	3 units
COMP7270 Web and Mobile Programming	3 units
COMP7300 Financial Technology	3 units
COMP7430 Health Information Systems: Architecture and Technologies	3 units
COMP7820 Visual Analytics and Decision Support	3 units
COMP7940 Cloud Computing	3 units

MSc Practicum & Research

COMP7280 MSc Practicum	3 units
COMP7960 MSc Research I	3 units
COMP7970 MSc Research II	3 units

2. Study Mode and Schedule

For **full-time study mode**, the normal and maximum periods of study are one and two years respectively. The normal study schedule is as follows:

	Semester 1 Units	Semester 2 Units
First Year:		
COMP7015 Artificial Intelligence	3	
COMP7180 Quantitative Methods for Data Analytics and Artificial Intelligence	3	
COMP7035 Python for Data Analytics and Artificial Intelligence	3	
COMP7990 Principles and Practices of Data Analytics	3	
COMP7950 IT Project Skills	1	
COMP7530 IT Forum		1
Elective Courses		15

For **part-time study mode**, the normal and maximum periods of study are two and three years respectively. The normal study schedule is as follows:

	Semester 1 Units	Semester 2 Units
First Year:		
COMP7180 Quantitative Methods for Data Analytics and Artificial Intelligence	3	
COMP7990 Principles and Practices of Data Analytics	3	
COMP7950 IT Project Skills	1	
Elective Courses		9
Second Year:		
COMP7015 Artificial Intelligence	3	
COMP7035 Python for Data Analytics and Artificial Intelligence	3	
COMP7530 IT Forum		1
Elective Courses		6

It is possible to **change your study schedule** to fit your needs (e.g., work schedule). For this purpose, please click [this link](#) to complete the e-form, titled “*Request for Changing Study Schedule Form*” and follow the instructions given on the e-form to seek approval.

3. Courses Offered in 2025-26 and Class Schedule

Day	Courses offered in Semester 1, 2025/26	Time and venue	
		First week 1 – 7 Sept 2025	Subsequent week 8 Sept – 29 Nov 2025
Monday	COMP7180 Quantitative Methods for Data Analytics and Artificial Intelligence (Section 1*)	6:30 – 9:20pm SCT502	(Same as first week)
Tuesday	COMP7035 Python for Data Analytics and Artificial Intelligence (Section 2*)	2:30 – 5:20pm FSC801C&D	(Same as first week)
	COMP7015 Artificial Intelligence (Section 1*)	6:30 – 9:20pm SCT501	(Same as first week)
	COMP7990 Principles and Practices of Data Analytics (Section 1*)	6:30 – 9:20pm SCT502	(Same as first week)
Wednesday	COMP7035 Python for Data Analytics and Artificial Intelligence (Section 1*)	6:30 – 9:20pm FSC801C&D	(Same as first week)
Thursday	COMP7180 Quantitative Methods for Data Analytics and Artificial Intelligence (Section 2*)	6:30 – 9:20pm SCT502	(Same as first week)
Friday	COMP7015 Artificial Intelligence (Section 2*)	6:30 – 9:20pm WLB103	(Same as first week)
	COMP7990 Principles and Practices of Data Analytics (Section 2*)	6:30 – 9:20pm WLB104	(Same as first week)
Saturday	COMP7950 IT Project Skills (Section 2*)	9:30am – 12:20pm SCT503 Four Saturdays on 6, 13, 20, 27 Sept	
	COMP7950 IT Project Skills (Section 4*)	1:30 – 4:20pm SCT503 Four Saturdays on 6, 13, 20, 27 Sept	
NA	COMP7960 MSc Research I	NA	NA

* The contents of different sections of the same course are identical. Please register any one of these sections.

Courses offered in Semester 2, 2025/26	Time and venue	
	First week 12 – 18 Jan 2026	Subsequent week 19 Jan – 25 Apr 2026
COMP7045 Natural Language Processing and Large Language Model	To be confirmed*	
COMP7055 Computer Vision		
COMP7065 Innovative Laboratory		
COMP7125 Prompt Engineering for Generative AI		
COMP7170 Data Security and Privacy		
COMP7200 Blockchain and Cryptocurrencies		
COMP7240 Recommender Systems		
COMP7250 Machine Learning		
COMP7270 Web and Mobile Programming		
COMP7300 Financial Technology		
COMP7530 IT Forum		
COMP7630 Web Intelligence and Its Applications		
COMP7640 Database Systems and Administration		
COMP7650 Data Mining and Knowledge Discovery		
COMP7810 Business Intelligence		
COMP7930 Big Data Analytics		
COMP7940 Cloud Computing		
COMP7280 MSc Practicum	NA	NA
COMP7960 MSc Research I	NA	NA
COMP7970 MSc Research II	NA	NA

* The class schedule for Semester-2 courses will be posted on the [Student Handbook](#) and [BUniPort](#).

Remarks:

1. The above information is tentative and it may be changed. To get the most up-to-date information, please access [BUniPort](#).
2. We conduct classes on weekday evenings and Saturdays, so that all students (local or non-local, full-time or part-time) can attend all these classes and interact with each other. We offer a few courses in the daytime so that full-time students could have enough choices (as they must take more courses in each semester). In this case, we will try to offer these courses in the evenings next year.
3. The classes in the first week of each semester are specially arranged so that students can sit in all elective courses in order to select the most suitable ones.

4. Other Courses

You can take at most two of the following designated courses:

MSc in AI and Digital Media (MSc AIDM)

MSc AIDM offers a few places of the following courses to MSc DAAI students. If you want to take the following course(s), you can register, add and drop courses through [BUniPort](https://buniport.hkbu.edu.hk/): <https://buniport.hkbu.edu.hk/>.

Semester, Year	Course	Time and venue
Semester 2, 2025/26	AIDM7040 Generative AI for Digital Media	To be confirmed*
	AIDM7340 AI for Digital Media	
	AIDM7880 AI Alignment and Data Governance	

MSc in Information Technology Management (MSc ITM)

MSc ITM courses belong to the MSc ITM curriculum and hence preference will be given to MSc ITM students. If you want to take the following course(s), the steps are as follows:

- Email your request to daai@comp.hkbu.edu.hk within the following period:
Semester 1: 1 – 8 September 2025
Semester 2: 12 – 19 January 2026
- If the course concerned has remaining quota, the Department will add this course for you and then you cannot drop this course; otherwise, your request will be declined.

Semester, Year	Course	Time and venue	
		First week	Subsequent weeks
Semester 1, 2025/26	COMP7550 IT Project Management	Tuesday 6:30 – 9:20pm AAB609	(Same as first week)
Semester 2, 2025/26	COMP7870 IT Innovation Management and Entrepreneurship	To be confirmed*	
	COMP7880 E-Business Strategies		

* The class schedule for Semester-2 courses will be posted on the [Student Handbook](#) and [BUniPort](#).

5. Course Registration and Schedule

You can register, add and drop courses through [BUniPort](#):

<https://buniport.hkbu.edu.hk/>

The 2025/26 teaching activity schedule is given in the following table.

Semester, Year	Activity and Schedule
Semester 1, 2025/26	• Class period: 1 Sept – 29 Nov 2025 • Add-drop period: 1 – 13 Sept 2025 • Examination period: 5 – 18 Dec 2025
Semester 2, 2025/26	• Class period: 12 Jan – 25 April 2026 • Add-drop period: 12 Jan – 24 Jan 2026 • Examination period: 2 – 15 May 2026

The 2026/27 teaching activity schedule will be posted on the following web page in mid 2026.

<https://ar.hkbu.edu.hk/student-services/useful-information/publications>

6. Graduation Requirements

Programme requirements:

- Successfully complete at least 29 units as specified in the Programme Curriculum.

University requirements:

- Obtain a cumulative GPA of at least 2.50.
- Satisfy all the University requirements.
